Bd. 21 Nr. 36 (2022): Cyber-Utopia / Dystopia? Digital Interculturality between Cosmopolitan and Authoritarian Currents

This edition of the Interculture Journal looks to bring together a number of concepts: cyber-utopianism/dystopianism, cosmopolitan and authoritarian currents, and tentatively introduces the term digital interculturality. The intellectual logic underpinning this conceptual combination firstly requires a degree of explanation, before introducing the articles that have responded to our call.
